

Tree Planting & Carbon Offset Receipt

Ecologi

Thank you!

Certificate of Offset

This document confirms that **SweetToothHampers.ie** has funded the planting of sufficient trees to offset the estimated carbon emissions associated with the production and delivery of all hampers distributed during the 2025 calendar year.

Scope of Emissions Covered

The offset calculation includes estimated emissions arising from:

- Product sourcing and manufacturing
- Packaging materials (including FSC-certified cardboard)
- Assembly and warehousing
- Nationwide courier delivery to individual addresses within Ireland

Environmental Commitment

Tree planting supports long-term carbon sequestration and woodland restoration.

Hampers & Gifts remains committed to reducing emissions at source while supporting responsible reforestation initiatives.

Verification & Transparency

Tree planting has been carried out through recognised reforestation programmes.

Calculations are based on standard UK and Irish carbon accounting assumptions for product and logistics emissions.

This receipt reflects estimated emissions and projected lifetime carbon capture. Carbon sequestration occurs over time as trees mature.
